Farbmuster Bezugsmaterial Colour Sample Cover Fabric

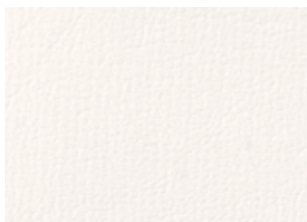

AUSSTATTUNG UND FARBEN NACH MASS.

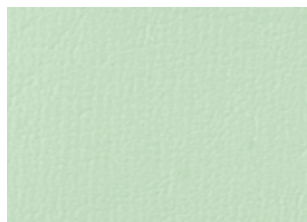

Komfort, Bezug und Farben. Hoher Anspruch in Design, Material, Technik und Ergonomie, kombiniert mit kundenorientierter Flexibilität, macht ATMOS zum Partner qualitätsbewusster Kunden auf Spitzenniveau. Daher steht patientengerechter Sitz- und Liegekomfort, der angesichts dauerhafter Behandlungszeiten über Stunden anhalten kann, im Fokus der Polster und Bezugsmaterialien. Das Material erfüllt sowohl die Anforderungen an Komfort und Anmutung, als auch an die tägliche Routine bei Strapazierfähigkeit, Reinigung und Desinfektion.

ATMOS Bezugsmaterial steht in 2 Varianten zur Wahl: Als Linie „COMPACT“, die sich durch Patientenkomfort, Langlebigkeit und Variantenreichtum in 20 Farben auszeichnet. Und als innovative Linie „PREMIUM“, die neue Standards setzt durch ihre extrem weiche und zugleich weit strapazierfähigere Oberfläche, und die in Kombination mit druckentlastenden Federn im Sitzteil bis heute unerreichten Komfort darstellt. Insbesondere bei Liegezeiten über Stunden ein erstklassiges Angebot – erhältlich in 12 verschiedenen Farben.

MADE-TO-MEASURE EQUIPMENT AND COLOURS.

Comfort, coverings and colours. High standards in terms of design, materials, technology and ergonomics combined with a flexibility built around the customer's needs makes ATMOS a premium partner for a quality-conscious clientele. This is why its upholstery and cover fabrics are all about providing patients with the level of comfort they are looking for when sitting or lying down – if necessary for hours on end, as some treatments can take a long time. As well as leaving nothing to be desired in terms of its look and comfort, the fabric is also robust enough to handle daily use, cleaning and disinfection.

There are two types of ATMOS cover fabric to choose from: the diverse "COMPACT" range, which offers patient comfort and durability and comes in 20 colours, and the innovative "PREMIUM" range, which is setting new standards with its ultra-smooth yet much sturdier surface and which boasts an unprecedented degree of comfort in combination with pressure-relieving springs in the seat. Available in 12 different colours, the range is a top-class choice, particularly for patients due to be lying down for several hours.

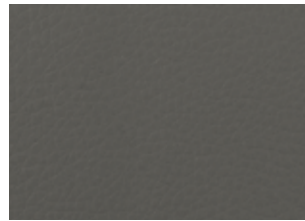

PREMIUM
